

**Fier Consulting** – *Accelerate Business*

### How to use Fier's email service?

1, I'm using POP3 email client software (Outlook/Outlook Express)

SMTP server: mail.myDomain.com; you may be required to use your ISP's smtp mail server here. Please confirm this with your ISP and asking for "which smtp server should I use to send my emails under [myName@myDomain.com](mailto:myName@myDomain.com)

POP3 server: mail.myDomain.com

2, I want to user Webmail.

Go to <http://webmail.myDomain.com> and type in your email address and password to login the Webmail module.

3, Change Password and other profile data:  
Login webmail and go to Settings→Options.
